Locations	Structural Inconsistencies		Recommended Corrections/Modifications to Ensure Program Access	M	Criteria — L=low, M=medium, H=high				mental Technical nformation	Finalized Actions		
Location	Identified Issue	ADAAG Specifications	Recommended Correction	Priority (overall)	Public Access	Frequency - PWD	Photo #	Conceptual Costs	Support Information	Finalized Correction	Date to be Corrected	Date Completed (Include initial)
1. Accessible Parking	The two existing accessible parking spaces are not clearly defined with painted	4.1.2(5)(b), 4.6.3	Supplemental technical information pertaining to ADAAG recommends that accessible vehicle parking spaces and access aisles be demarcated (painted) to ensure appropriate clear widths exist. Stripe accessible vehicle parking areas and adjacent access aisles so that the width of each is clearly discernable ensuring appropriate widths exist.	L	Н	M	0	\$200	Accessible Parking Detail Access Board – Bulletin #4			
2. Accessible Parking	One of the existing accessible parking spaces is not accessible due to a curb ramp that protrudes into the access aisle.	4.6	Access aisles, which are adjacent to accessible parking spaces, are required to be level along the access aisles length and width. Curb ramps protrude into the access aisles making their usability questionable. In addition, the existing curb ramp has a drop-offs on one side, which may be hazardous for those using them. Modify the existing parking space and curb ramp to comply with ADAAG specifications.	H	Н	M	1 2	\$1,00 0	Accessible Parking Detail Access Board — Parking Technical Bulletin

3. Accessible Routes	An accessible path of travel does not lead to picnic tables.	15.6.4 .1 (GAD AAG FR)	Technically, ADAAG nor the Recreational Facilities - Final Rule provide scoping for picnic tables. In addition, neither guideline provides specifications for what would constitute an accessible picnic table. However, the document titled "Accessibility Guidelines for Outdoor Developed Areas" (AGSAPT) does provide both scoping and specifications for accessible picnic tables. These Guidelines (AGSAPT) are neither final rules nor enforceable. Generally, we consider picnic tables and other park amenities for use by the general public to be services provided by local governments, which own or operate the park. Therefore, to ensure compliance with Title II's program access requirements, we recommend following the scoping and specifications provided by the AGSAPT to determine the accessibility of picnic tables. According to AGSAPT, section 16.5.1.2 requires that where two or more fixed picnic tables are provided in a picnic area, at least 50 percent, but no less than two, shall comply with 16.5. Of the picnic tables required to be accessible, 40 percent, but never less than two, shall be located along an outdoor recreation access route. Provide an accessible path of travel (concrete, asphalt or rubber) leading to the end sections of an appropriate number of picnic tables. This path should connect to the end side of the table to allow the user to be seated at the end of the table.	L	Н	M	4	\$500	AGSAPT			
4. Interior - Kitchen	The paper towel dispenser is located to high at 60-inches to the highest operable part.	4.2.5 4.2.6 4.24	At least one of each type of dispenser is required to be accessible and must be within a maximum reach range of 54-inches where a side reach is possible and a maximum of 48-inches where only a forward reach is possible, to the highest operable part. Ensure at least one paper towel dispenser is within ADAAG specified reach ranges.	M	Н	M	2	\$50	See Building Block #10 – Reach Ranges #1, #2, #3

5. Interior - Kitchen	The telephone is located too high measuring 66-inches to the highest operable part.	4.25.3	Where phones are provided, at least one must comply with reach ranges defined by ADAAG 4.2.5 or 4.2.6. Lower phone to comply with ADAAG specifications. In addition, ensure that the telephone complies with all other ADAAG specifications, such as TDD's, where necessary. Generally, this is the telephone companies responsibility to adjust phone height. Note: If four or more public pay telephones (including both interior and exterior telephones) are provided at a site of a private facility, and at least one is in an interior location, then at least one interior public text telephone (TTY) shall be provided. If an interior public pay telephone is provided in a public use area in a building of a public facility, at least one interior public text telephone (TTY) shall be provided in the building in a public use area.	L	H	M	N A	\$0	Building Block 10 – Reach Ranges				
6. Interior - Kitchen	Round door hardware exists on public doors throughout the facility.	4.13	According to ADAAG, any doors used by the general public in existing buildings are required to have opening hardware, which does not require tight grasping or twisting of the wrist to operate. Modify all doors used by the general public by replacing door knobs with lever-type hardware or installing add-on levers.	L	М	M	1 1	\$150	See Attachment B – Accessible Door Hardware for information on inexpensive add-on lever handles.				
7. Interior - Kitchen	The sink is not accessible due to numerous barriers.	4.24	The existing sink does not provide knee and toe clearance due to cabinets underneath. According to ADAAG, knee clearance that is at least 27 in (685 mm) high, 30 in (760 mm) wide, and 19 in (485 mm) deep shall be provided underneath sinks. In addition, each sink shall be a maximum of 6-1/2 in (165 mm) deep. According to the program access provisions of Title II, programs or services offered to the general public shall be accessible and usable by individuals. Therefore, if this sink is used by the general public, then it should be made accessible, complying with ADAAG specifications.	M	Н	M	9	\$500	ADAAG 4.24

8. Interior - Restrooms	A hi-lo drinking fountain does not exist.	4.15 4.1.3(10(a)	According to ADAAG if only one drinking fountain is provided on a floor there shall be a drinking fountain which is accessible to individuals who use wheelchairs and one accessible to those who have difficulty bending or stooping. Cups at inaccessible drinking fountains are considered equivalent facilitation. Provide a cup holder at this fountain and a cane detectable area underneath.	L	Н	M	1/2	\$0	Building Block 7 – Drinking Fountains ADA TAM 3 – P 34			
9. Interior - Restrooms	The lavatories in the men's and women's restrooms have exposed pipes underneath.	4.19	Pipes under lavatories are required to be insulated or otherwise configured to avoid contact. Ensure at least one lavatory, in each restroom, complies with ADAAG specifications.	L	Н	M	<u>1</u> <u>3</u>	\$250	See Attachment 4 – <u>Lavatory</u> <u>Specifications</u> for more information on accessible lavatories.			
10. Interior - Restrooms	The mirrors, in the men's and women's restrooms, are located too high at 42-inches.	4.19.6	At least one mirror in each restroom is required to be located so that the bottom edge of the reflecting surface is a maximum height of 40-inches. Typically, this barrier can be removed by installing an additional full length mirror. Install a full length mirror in each restroom.	L	Н	M	1 3	\$50	ADAAG			
11. Interior - Restrooms	In the men's and women's restrooms, the paper towel dispenses are not within reach range.	4.2.5 4.2.6 4.24	At least one of each type of dispenser is required to be accessible and must be within a maximum reach range of 54-inches where a side reach is possible and a maximum of 48-inches where only a forward reach is possible, to the highest operable part. Ensure at least one paper towel dispenser, in each restroom, is within ADAAG specified reach ranges.	M	Н	M	1 3	\$0	See Building Block #10 – Reach Ranges #1, #2, #3			
12. Interior - Restrooms	The urinal, in the men's restroom, is located too high.	4.18	At least one urinal is required to be located so that the rim is a maximum of 17-inches high. Existing urinals have rims located at 24-inches high. Modify one urinal so that the rim is no higher than 17-inches.	L	Н	M	1 4	\$100	Seethe Accessible Urinals figure for more details.
